

Machine Learning Engineer (Architect Track) — USA

Company	Caylent
Work Model	Fully Remote (US, Canada, LATAM)
Team	Cloud Data Engineering

About Caylent

Caylent is a cloud-native services company helping organizations bring the best out of their people and technology with Amazon Web Services (AWS). We deliver end-to-end AWS services—from workload migrations and modernization to cloud-native application development, DevOps, data engineering, security and compliance, and everything in between. We're a global, fully remote team that celebrates diversity, curiosity, and craftsmanship.

The Mission

We're seeking an exceptional Machine Learning Engineer on the Architect track to join our growing Cloud Data Engineering team. You will partner with customers, partners, and internal teams to design and deliver production-grade ML systems on AWS—bringing cutting-edge ideas to market with measurable impact.

Your Assignment

- Serve as a mission-control specialist across Agile ceremonies (stand-ups, retrospectives, planning).
- Translate customer requirements into a clear, prioritized backlog and technical tickets.
- Delegate work and provide technical leadership to a team of engineers to deliver customer outcomes.
- Lead requirements gathering, backlog grooming, and architecture discussions.
- Apply strong DevOps and platform fundamentals: build automation, branching, CI/CD, IaC, security, monitoring, logging, and alerting.
- Troubleshoot and resolve issues across dev, test, and production environments.
- Automate testing at multiple levels (component, configuration item, subsystem, system) and monitor results.
- Write production-quality code with unit and integration tests.
- Deliver robust cloud-native ML applications on AWS.
- Document designs, decisions, and operational runbooks with clarity.
- Model "Stay Curious": mentor peers, explore new technologies, and learn from world-class engineers.

- Coach and mentor less-experienced teammates; both coach and be coached.

Your Qualifications

Core Consulting Qualifications

Customer Experience

- Confidently addresses client questions; identifies requirement gaps and proposes next steps.
- Delivers clear, actionable solutions that meet client goals.

Collaboration

- Facilitates alignment across stakeholders on priorities and deliverables.
- Navigates differing perspectives professionally to ensure shared understanding and progress.

Communication

- Explains complex technical concepts to non-technical audiences clearly and concisely.
- Adapts style to audience and context to improve clarity and decision-making.

Technical Qualifications

- Proficiency with Infrastructure as Code (IaC): CloudFormation, AWS CDK, Terraform.
- Expert-level Amazon SageMaker and hands-on with ML libraries: TensorFlow, MXNet, PyTorch, scikit-learn.
- Strong understanding of ML fundamentals: feature engineering, hyperparameter tuning, optimization strategies.
- Familiarity with MLOps tooling and experiment tracking: MLflow, Neptune, Comet.

Benefits

- Medical, Dental, and Vision insurance for you and eligible dependents.
- 401(k) with company match up to 4% and immediate vesting.
- Competitive phantom equity.
- Company-issued laptop.
- Short/Long-Term Disability Insurance and Term Life Insurance.
- Flexible Spending Account (FSA).
- Equipment & Office Stipend.
- Annual Learning & Development stipend.
- Unlimited Paid Time Off + 10 Paid Holidays.
- Up to 25% travel may be required based on business needs.

Compensation

Base Salary Range: \$140,000 – \$157,500 per year, commensurate with experience and qualifications.

Additional Compensation: May include bonuses, commissions, equity, and other incentives subject to role, individual performance, and company performance.

Caylent is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees.
