WORK EXPERIENCE

DevOps Engineer, Gamers Club - *jan/2020 - present* - Sorocaba, São Paulo

Gamers Club is the biggest eSports platform on latin america.

- Migrate several Docker Container applications to Docker Swarm and kubernetes (EKS).
- Leveraged Rundeck, Bash Scripts and Jenkins to automate tasks and maximize productivity.
- Implemented monitoring for some environments using Pingdom, Graylog, Prometheus and Grafana.
- Created several AWS environments with terraform.

DevOps Engineer, Diebold Nixdorf - *apr/2018 - jan/2020* - Indaiatuba, São Paulo

Diebold Nixdorf employs approximately 25,000 employees in more than 130 countries. Specialties: financial and retail self-service solutions, security solutions, software, cash management, etc.

- Implemented Docker Container orchestration with Kubernetes (EKS) and AWS Elastic Container Service.
- Leveraged Ansible, Rundeck, Bash Scripts and Python to automate tasks and maximize productivity.
- Created a MongoDB Replication with 3 nodes to maintain application high-availability.
- Implement more frequent backups on Elasticsearch and PostgreSQL to increase environment security.

DevOps Engineer, Linte - *aug/2017 - apr/2018* - city of São Paulo, São Paulo

Linte is a legaltech startup of document automation and data management that seeks to eliminate wasted time and information in operational activities.

- Implement Docker Container orchestration with AWS Elastic Container Service.
- Created a MongoDB Replication with 3 nodes to maintain application high-availability.
- Implement Continuous Integration/Continuous Deployment with AWS CodeBuild and AWS CodePipeline.
- Leveraged Bash Scripts, python and AWS Cloud Formation to automate tasks and maximize productivity.

Cloud Solutions Architect, OTG - *jun/2016 - jul/2017* - Sorocaba, São Paulo

OTG is a pioneer in servicing and support services for multi vendor servers and storage units for critical mission in Brazil.

- Provide expert pre-sales technical assistance and product education.
- Analyze prospect requirements and establish parameters to ensure client receives the right solution, in conjunction with the Sales Representative.
- Worked closely with sales team and client system administrators as the technical resource for various PaaS and IaaS technologies and solutions.
- Helped clients to migrate their workload to AWS using CloudVeloX Solutions, include databases and applications.
