About David

DevOps engineer with 3+ years of experience managing infrastructure for applications with millions of users. I focus on scalability and performance and have helped save a lot of funds by reducing infrastructure costs while improving performance.

Experience:

Company: GNI FZ LLE (Fujairah, UAE)
Position: DevOps Engineer (Freelance)
2019 to date

Duties:

Providing DevOps, CI/CD, code reliability testing, and other development services for clients.

- ✓ Deploy script to implement a CI/CD process that reduced the time to deploy from hours to minute.
- ✓ Shifted operations from a puppet environment to a more modern Docker-based service architecture
- ✓ Saving the company lots of money by leading a transition from GCP to AWS which improved performance as well as saved a lot of money
- ✓ Led the architecture transition from a single monolithic app into microservices using Docker Containers and implemented APIs to interact with each microservices
- ✓ Effective use of Scripting Docker, Kubernetes.
- ✓ Good knowledge of Linux flavors
- ✓ Comfortable on the CLI in most Linux flavors
- ✓ Experienced Linux System Admin
- ✓ Effective use of Jenkins for CI/CD pipelines
- ✓ Good use of GitHub for effective collaboration
- ✓ Comfortable with working from home office (Remotely)

Company: Satguru Travels and tourism (Dubai)
Position: Linux System Admin / Visa Consultant
2018 to 2019

Duties:

- ✓ evaluate hardware and software to determine the best design and configuration for the production environment in which they are employed.
- ✓ Identify and Resolve System Issues
- ✓ Maintain the System
- ✓ write documentation that will help system users and the systems administration team to utilize the system efficiently and effectively.
